

STEVA Sports Software Inc. takes the next step in Video Analysis Software.

Ottawa, On. April 29, 2005 - STEVA Sports Software Introduces STEVA Soccer (Football) DVD, A Professional Quality Video Analysis tool at the Industry's Lowest Price

Shortly following the release of STEVA Hockey DVD, STEVA Sports Software Inc. today announces a new software solution for Soccer (Football) teams looking for a comprehensive, affordable, DVD based video analysis tool. Until now, video analysis software could only handle "raw" video formats resulting in large file sizes and requiring expensive storage hardware. Existing analysis software products either cannot handle the DVD file format or require time consuming, third party software to deal with this issue.

STEVA Soccer DVD has solved this problem! With STEVA Soccer DVD, users can take video from all sources, digital camcorder, VCR, DVD recorder, or directly from a DVD and analyze the game or practice as they desire. Once the analysis is complete and the desired video clips chosen, STEVA Soccer DVD allows the user to save these clips in many different ways, including onto DVDs. The movie creation portion of STEVA Soccer DVD includes the ability to add music and visual transitions, all within the program! The creation of STEVA Soccer DVD allows serious users to save hundreds of dollars in hardware storage costs and save many hours in video conversion & storage required by other products.

Most competitive coaches perform some sort of video analysis, usually "deck to deck" (using 2 VCRs). This is slow and tedious and can easily take 3-4 hours per match. STEVA Soccer DVD reduces this in half, leaving the coach more time to coach.

Just like STEVA Soccer Basic and STEVA Soccer Advanced, STEVA Soccer DVD is an easy to learn, easy to use, pc based video analysis tool. The team at STEVA Sports Software has a solution that fits into any team or association budget. From U10 up to University or the pros, STEVA Sports Software has affordable products that will meet your needs, and offers unrivaled functionality and features at the lowest price on the market.

STEVA Sports Software Inc. is committed to providing professional quality video analysis software to athletes and coaches. Through much research and development, STEVA Sports Software Inc. now offers such a tool, without the large price tag. Athletes respond best through visual feedback, and there's no finer method than teaching by example - Visualize Success!
